ARM BASED 32-BIT MICROCONTROLLER

Powered by an ARM 32 bit microcontroller, the IRIS Optical RGB provides lightning-fast processing power and speed to handle the most demanding of calculations, without compromising valuable computer resources.

ENHANCED 20 MILLION CLICK GAMING GRADE SWITCHES

The use of high quality durable gaming grade switches provide a truly enhanced tactile response from each click; and with a 20 million click lifecycle, the IRIS Optical RGB gaming mouse plans to compete as long as you do.
